

EDWAY NET SCRIPT

Good evening everyone, this is (Name) (Call sign) net control opening the Edmonds-Woodway Tuesday Net.

This net meets every Tuesday at 7 pm local time on the WA7DEM Repeater system at 443.725 on Narrow-Band FM with a tone of 156.7. If we cannot use the repeater because of a failure or if it's being used for other traffic, we'll move to 146.48 simplex.

Emergency traffic always has priority. Any stations with emergency or priority items check in now please.

.....*leave a break for traffic*.....

Let's check with our mobile stations before they go out of range. Are there any mobile stations that wish to check in?

.....*pause*.....

The purpose of this net is to allow hams in South Snohomish County to meet other amateur radio operators and to pass on information of events and other items of interest to our local amateur community. This is an open net and everyone is invited to join in.

We will now have a roll call of our active members. I'm reading from a script which is published on our website, along with the roll call itself. You may follow along at www.edwaynet.com on our Tuesday Net page.

If you want to check in without any comments just say, "In and Out."

To be added to the active list simply check in a few times. To stay on the active list please check in at least once per month.

At the end of the roll call we will check for any visitors, late check ins, comments, questions, and announcements.

Now we will start the Roll Call of active stations. After all check-ins there will be time for comments.

As a reminder, this repeater is Narrow-Band FM with a tone of 156.7 as of April 2025.

.....*roll call*.....

Any late check ins or visitors to the net please come now. Please give your call sign phonetically and your name.

Now we will check to see if there are any comments, questions, and announcements.

.....*prompt each check-in for comments*.....

Announcements from net control as follows:

.....*pause*.....

Is there any final business for the Edmonds-Woodway Net this evening?

.....*pause*.....

Net control for next week is published on the web at www.edwaynet.com

This is (Call sign) Net control for the Edmonds-Woodway NET closing the net at (Time). We wish to thank the Snohomish County Auxiliary Communications Service for the use of the WA7DEM repeater and return the repeater to normal Amateur use at this time. See you next Tuesday at 7 pm!
